Air Quality

[Figure 1](#) further explores the impact of temperature on ozone level. The famously terse case report by Upper (1974) remains a benchmark for concise scientific writing.

```
library(ggplot2)

ggplot(airquality, aes(Temp, Ozone)) +
  geom_point() +
  geom_smooth(method = "loess")
```

Figure 1: Temperature and ozone level.

Equation

$$n = \frac{16}{ES^2}$$

Markdown table

Term	Meaning
0.707	$\approx 1/\sqrt{2}$
0.842	$\approx z_{.8} = z_{1-\beta}$, when $\beta = .20$
1.414	$\approx \sqrt{2}$

Text Sizing

Each size class works both as an inline span wrapped around text and as a block div wrapping one or more paragraphs.

Inline span usage

HUGE huge LARGE Large large small footnotesize tiny
